# Trailer Grader GT-300AUS

**Fransgård**  
www.fransgard.dk

New model Trailer Grader from Fransgård's has the same great advantages as the GT-DKH version. However the GT-AUS sets new standards within professional blades and has a unique construction of the horizontal angle, is set up to 20° at each side between the blade and the frame with the 2 big wheels.

This blade always levels with the road and it makes an effective "roof construction" resulting in the water running off the road. The reverse side of the blade has a smart construction which presses excess material down in the road when the driver reverse without turning the blade. A great advantage when arriving to an asphalt road.

As extra equipment it is possible to increase the blade by 25 cm in each side, so the total width will be 350 cm

This well thought out product is built in high strength steel and is the only product in the market which has a unique turntable with changeable wear plates.

<b>Model:</b>	<b>GT-300AUS</b>
Work width:	300 cm
Scraper height:	70 cm
Offset adjustment mechanical right/left:	60 cm
Hydraulic turnable blade:	60°
Horizontal setting hydraulic:	20°/20°
Hydraulic output:	4 double
Turnable reinforced steel Hardox 500:	Standard
Wheels	Standard
Snow wing right:	Possible
Side plate:	Possible
Weight:	1270 kg
