KRONOS

With over 100 years of experience.

GRIPTO 1010

THE BIGGEST

AND MOST EFFECTIVE LOADER FROM KRONOS

OUTREACH 10 M • LIFTING CAPACITY AT TEN METERS OF 630 KG • TURNING MOMENT 30 KNM

MORE POWER, MORE OUTREACH, MORE SPEED, MORE COMFORT

With this development, Kronos has reacted to the requirements of the forestry professionals, who need a stronger and faster crane with approx. 10 metre reach. The new Gripto 1010 is the ideal choice for handling timber combined with a large Kronos 150, 140 or 160 trailer or directly mounted on a tractor. Gripto is also very suitable for feeding a chipper. Even though outreach is 10m, the design and dimensions of the booms are optimized to give good working characteristics working close in. We have put a lot of effort in getting a more equal speed of the knuckle boom throughout the whole working sector. The result is a very precise control of the boom. Furthermore, the Gripto is equipped with a top quality LED working lights on the outer boom for illuminating the grab area.

OUTSTANDING OUTREACH OF 10 METERS

The new Gripto has an outstanding 10 meters outreach combined with a 630 kg lifting capacity at ten meters and a 30 kNm turning moment. Hydraulic hoses and tubes are among the largest in loaders of this size combined with a very slim knuckle boom. The new control system xCrane enables very good individual adjustments for the operator.

MAINTENANCE MADE EVEN SIMPLER

A great deal of effort has been put to ensure easy maintenance. All glide pads are of equal size, nipples are easily accessible, and the replacement of hoses is made easy. The hoses are also very well protected inside the booms and at the crane tip, they go through a new design of the link.

GENUINE KRONOS QUALITY

Kronos has been known for using material of great quality. The new Gripto-loader uses Swedish high strength steel made by SSAB called Strenx-700. The new material has greater strength features than any other steel quality available on the market.

MY INNER STRENX®

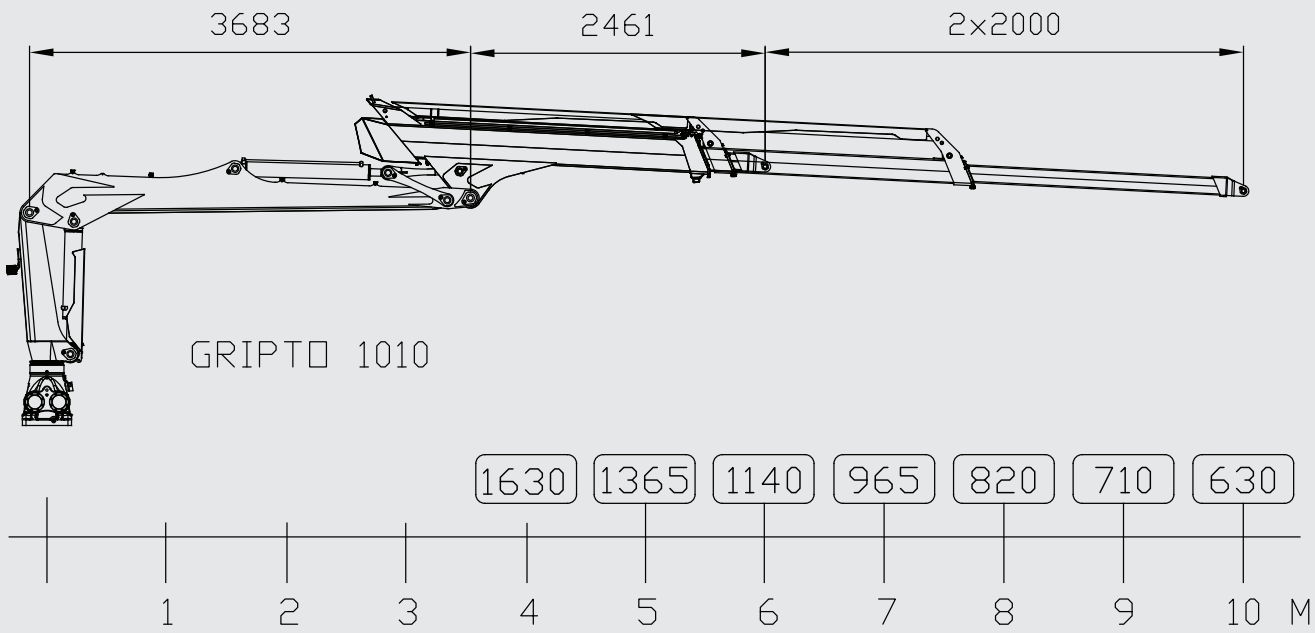

Kronos is the first Finnish manufacturer licensed to use SSAB My inner strenx-brand for marketing purposes.

GRIPTO 1010

TECHNICAL SPECICATIONS

MODEL	GRIPTO 1010
Max outreach, [m]	10
Lifting moment, brutto [kNm]	104
Lifting capacity, [kg]	
4 m	1630
at max. reach	630
Turning angle boom, [°]	380
Turning moment, brutto [kNm]	30
Weight, basic crane, [kg]	1600
Weight, grapple + rotator, [kg]	250
Recommended grapple size, [m²]	0,27
Recommended pump:	
working pressure, [bar]	210
output, [l/min]	100-180
